tutor ID: 15421

city: E13 London, Great Britain

Online option:

Ich bevorzuge Unterricht vor Ort, aber schließe Onlineunterricht nicht aus.

Subject:

Mathematics, Physics, Chemistry, French

qualification:

Physicists-Mathematician

level:

Undergraduate, GSCE, A levels, professional...

details:

I am first of all, naturally clear-minded and prize clear thinking. Mathematics are, so far as I am concerned a mere language with its lexies ("words") and sentences. It is often said that I possess a god-given ability of deciphering and discriminating difficulties that people oftentimes encounter in Maths and supply them with the clearest explanation there could be. My philosophy may be perhaps summed up in the followings : "Everything that is complicated is said to be so, because it is made up of simple elements" Complication has then a borrowed existence, borrowed from the simplicity of elements from which it has been formed, as Leibnitz (German philosopher) would have added. Mathematics are in effect complicated but are in fact simpler than saying hi! I have tutored and taught Maths, Physics to people of a wide range of difficulties and hold a valuable experience, specifically of how to set about finding the best enlightenment for difficulties experienced by a specific student. I am 28 years old and I started to discourse upon mathematics at 16, before even entering University. This is the least it could be said about me. I am naturally patient, listener, open-heartedly
friendly...
