Details:

I have 4 years experience in tutoring Mathematics for Grade 8 - A' Level students. This year all of my students got A and A* in exams. I approach different techniques for different level of students. This is the main reason for my students get good
results.

I am educated to degree and specializing in Mathematics. I offer Mathematics throughout primary and secondary school to A’ Level. I have experience of working in both school and college, though now prefer to concentrate my efforts on 'private tuition' in which I have had considerable success and find stimulating and rewarding. I am fully conversant with the Mathematics syllabus throughout primary and secondary school and aim to pass this knowledge on to the pupil in a supportive atmosphere, tailoring lessons to the needs of the individual
pupil.

* The underlying factor for my success is my ability to change my style of teaching according to each student’s ability, including past exam papers and numerous specimen
papers.
